

Telemedicine Visits for Alpha Thalassemia at Newborn Screening

1. If you had not been able to use telemedicine to get specialty care today, what would you have done?
(Check all that apply)

- I would have traveled to Honolulu
- I would have waited until the genetic specialist came to a clinic near my home so I could see the geneticist in person.
- I would have seen a different health provider in my own community.
- I would not have received the specialty genetics care my child needed.

2. If you had traveled to Honolulu for today's visit, **your child's insurance** would have covered the following expenses:
